## ING IS NICKEL AND DIMED

a and a golfer I agree with the Sound  
r regarding improving the "Wreck"  
question a city the size of Brandon needs  
all parks soccer fields, etc. to attract  
events. As far as the "Wreck" Centre is  
ouncil and administration do not seem to  
sible plan, qualified golf industry staff  
10 million required to upgrade the dike,  
bhouse with restaurant lounge and  
d on what I have heard, there will be \$1  
g the dike, which only fixes about 50 per  
em and a half-assed pro shop might be  
at might get built if they maybe sell the

doesn't embarrass our city around the time you start collecting  
a pension cheque.

## MINING NOT WORTH THE CASH FOR MANITOBA

Consult, consult, consult. Catherine Cox is going to have a  
busy summer. The previous Manitoba government had come  
to the realization that the cost factor of mining cleanups far  
outweighs any mining benefits for the province or the people  
of Manitoba. They were aware of the deadly mining pollution  
(i.e. Flin Flon) and also the tragic costs to the environment  
and our water sources. Pollution cleanup is very costly. All  
governments need to step back now, learn and do things right.  
That is exactly what the former NDP government in  
Manitoba was doing. When it comes to protecting Manitoba's  
water, I very much doubt that Minister Cox, or her deputy  
minister, Grant Doak, and staff have ever heard of the Little  
Saskatchewan River, and all the tribulations that have been  
taking place for the past several years.
